

OpCon™ can automate IT for an entire enterprise across multiple platforms from a 'single point of control'.

It's simple: Everyone wants to grow their business and increase profitability, but it gets harder every day. To achieve this goal, you look for ways to **reduce operating costs, increase efficiency, and eliminate risk ... without compromising customer service.** What's the answer? Automation. Historically, automation is implemented to complete tasks quicker, with less cost, and fewer errors. It's still true today. Better use of automation will help you achieve these business objectives and many more.

OpCon is a fast, flexible way to automate, schedule and control a wide range of IT and business processes across multiple platforms. It eliminates tedious, repetitive manual entries and the monitoring associated with running complex IT and operational processes.

OpCon reduces errors, increases efficiency throughout your organization, saves time and money, and ensures a stable and secure environment that ultimately results in world class customer service.

OpCon allows you to...

- "Do More With Less" without compromising your customer service or employee morale
- Decrease your operational costs: Time, Staff, Infrastructure
- Ensure a stable, secure environment reducing risk
- Eliminate errors that are costly in expense and reputation
- Ensure customer support to retain and gain new business

ABOUT SMA

SMA has delivered leading-edge enterprise automation solutions to businesses and government entities worldwide since 1980. Today, SMA remains a privately owned American corporation whose technology automates IT environments in 24 countries.

OpCon™ continues to be today's singular automation and job scheduling solution supporting every known operating system and platform.

Don't just take our word for it...

Increased daily run jobs from 500 to 450,000 and reduced staff from 13 FTEs to 10 FTEs — a 9,000% workload increase with a 23% staff reduction.

— *Carnival Cruise Line*

Automation decreased run time for one job from 13 minutes manually to 3 minutes and another from 45 minutes to 5 minutes. Also, efficiency increased five-fold, boosting the number of executed jobs per day from 500 on a single system to over 5,000 distributed to more than 100 systems ... without adding staff.

— *Baxter Credit Union*

Eliminated 2 million keystrokes annually with OpCon.

— *Schools First Credit Union*

OpCon has virtually eliminated incorrectly run jobs, reduced the need for after hours intervention, created a less stressful work environment, and improved service to end user.

— *Baylor College of Medicine*

"In our environment, we have eliminated manual processing in every corner of our operation possible (approx. 98-99%)."

— *Synergent*

Multi-platform capability

OpCon's multi-platform, multi-tasking capabilities are simply unparalleled. It supports every operating system and hardware platform available in today's marketplace. No other product can compete with this comprehensive compatibility.

IBM	Unisys	HP	Unix	Microsoft	Other
z/OS	ClearPath MCP	MPE/iX	HP-UX	Windows NT	SUN
i/OS	ClearPath 2200	HP/Compaq	Compaq	2000	Linux
AIX	ES7000	Open VMS	IBM AIX	2003	Datacenter
z/VSE	BIS (Mapper)	HP NonStop (Tandem)	Unixware	XP	
		Tru64	Sequent	Windows 7	

Experience significant cost savings with additional automation. OpCon's automation will eliminate hours of tedious task management, manual and operational errors to allow you to redeploy your assets and staff to more revenue generating projects.

Eliminate silos with unique programming and operational requirements for each OS.

Automate complex processes with multiple threads of execution, ensuring tasks are conducted in sequence.

Run jobs and processes successfully every time with flawless repeatable performance: run as scheduled with no errors.

Automate high risk processes that require specialized knowledge, insuring accuracy and eliminating risk.

Experience world class, client support 24/7, speaking with real people — not machines.
