

## **SMA OPCON/XPS DOES EVERYTHING BUT POP THE CORN.**

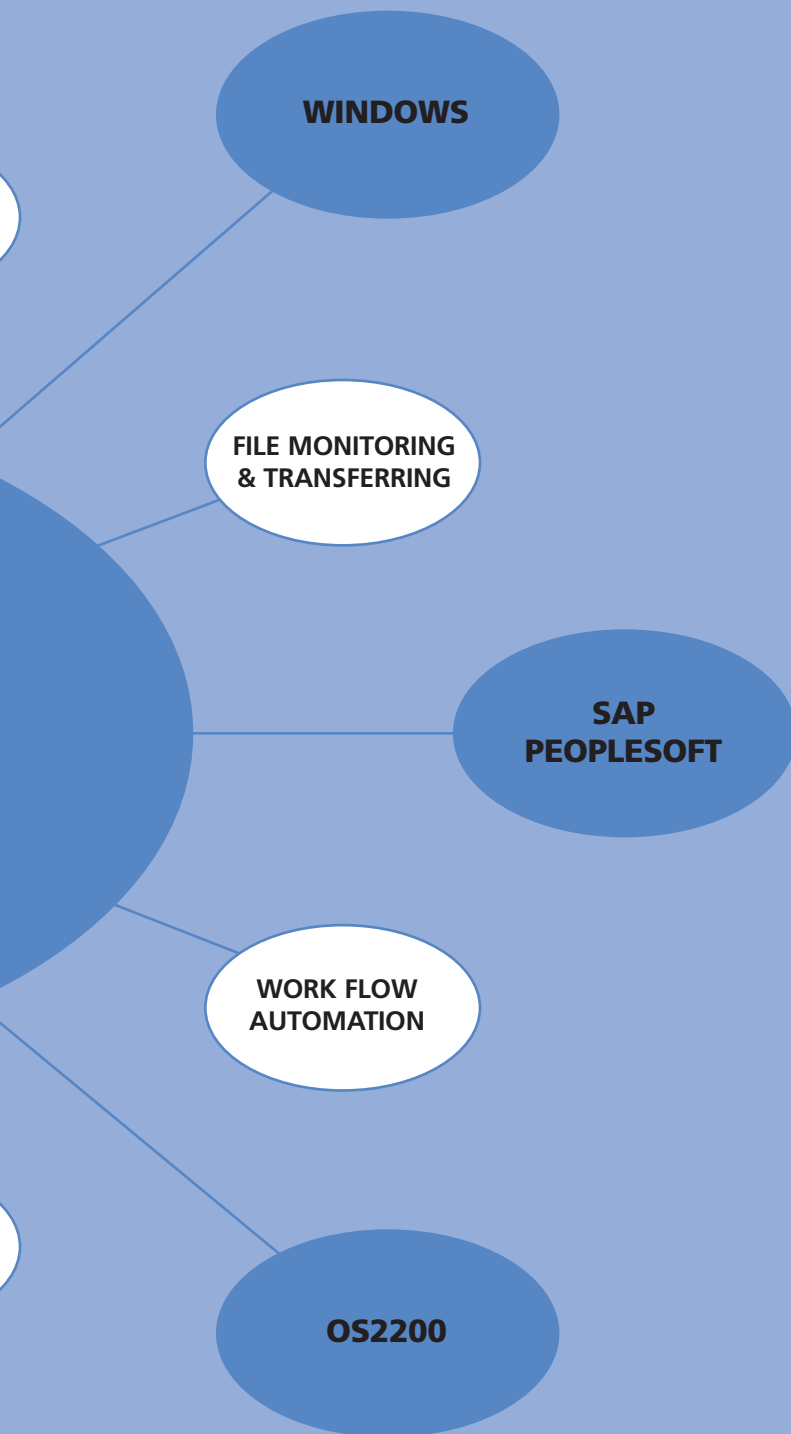

*Looking for the ultimate IT automation tool? SMA OpCon/xps™ is a fast, flexible way to automate, schedule and control a wide range of IT and business processes. We made it multi-platform compatible to support virtually every application and environment found in today's global enterprises. It's one efficient tool that does the work of many, dynamically responding to changes as they occur so you don't have to hit the panic button at 3 a.m. For over 25 years, we have grown to keep pace with industry innovations, making us the most compatible and powerful automation tool available. Learn how SMA OpCon/xps can reduce your IT costs, complexity and risks. Visit [smausa.com](http://smausa.com) or call 877-762-6584.*

# **SMA**

**The universal remote of IT automation**

# THE UNIVERSAL REMOTE OF IT AUTOMATION

## ONE TOOL THAT DOES THE WORK OF MANY

Want to gain control of IBM, Unisys, Sun, SCO, Microsoft, Linux, Sequent, Siemens, PeopleSoft, HP, SAP and more?

Nothing is more powerful than SMA OpCon/xps. Now, from a simple Microsoft Windows application, you can control virtually all the processes in your data center regardless of the platform or apps you're running.

## MUCH MORE THAN A SCHEDULER

SMA OpCon/xps can automate the many processes that make up your day-to-day business.

Think of it as a person operating at the speed of light. OpCon/xps handles any problems it encounters on the fly, following the procedures you establish.

## BEYOND CLOCKS & CALENDARS

With OpCon/xps, you can define almost anything to trigger a process, not just dates and times. It might be a sudden surge in traffic. A certain level of demand. The posting of a report. The arrival of a shipment. The volume of orders. An emergency shipment. The death of a hard drive. A flood in Phoenix. You get the idea. OpCon/xps enables true event-driven automation. The possibilities are endless.

So if one machine goes down, your whole day doesn't go bad. OpCon/xps continues processing unrelated jobs, notifies a human of the problem, and handles the first job after the problem is fixed.

## MORE THAN 25 YEARS OF SAVINGS

You don't need to purchase and support a dozen programs to tame all those unruly technologies. You don't need to lose sleep. You just need OpCon/xps - from SMA, the company that has been making data centers more efficient for more than 25 years.
