

Disaster Recovery

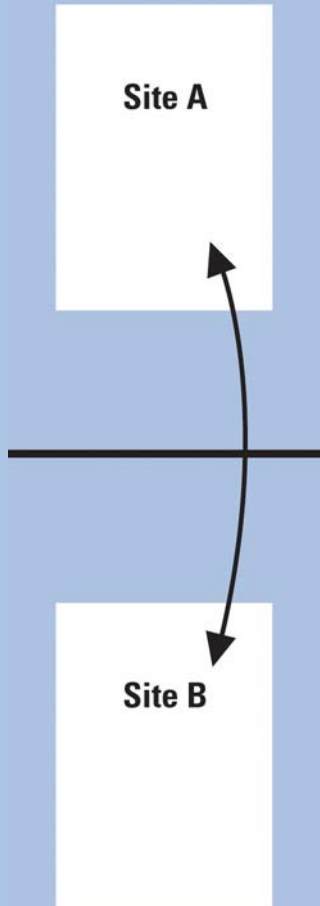

What OpCon/xps does

- Automates recovery in event of:
 - Local system crashes/machine failure
 - Complete loss of data center
- Mirrors processes and data to secondary machines
- Resumes processing from point of interruption

Disaster Recovery

How OpCon/xps works:

- Install SAM and supporting services on network for automatic fail-over
- Mirror equipment, software and data on secondary machines or at secondary sites
- Define jobs to run on both machines or at both sites but identify one as down
- OpCon/xps can detect failure, manage shift, and automate recovery

Disaster Recovery

Benefits:

- Business continuity
- Supports service-level agreements
- Contract compliance
- Shortens recovery time from hours/days to seconds/minutes
